

# DevOps: The Numbers

Bringing Dev and Ops teams together for seamless communication and collaboration, to allow for better development, testing, releasing, and maintenance of software. Teams can release more reliable software more rapidly.

**22%** say continuous integration reveals potential problems prior to release

**24x**  
FASTER RECOVERY FROM FAILURES

Employees in high-performing teams are 2.2x more likely to recommend their organisation as a great place to work

Almost 30% of teams say that information is available, but knowledge sharing only happens when specifically requested.

**61%** of monitoring solutions predict potential issues before users are affected

Sources: <https://cvcm.me/devops-numbers>

**81%** OF DEVELOPMENT AND OPERATIONS TEAMS SHARING INFORMATION AND USING THE SAME TOOLS

2,555x SHORTER LEAD TIMES

**41%** of new applications occasionally have minor issues requiring fixes once in production
