

Email Security Solutions

Protect your inbox from phishing, unsafe attachments and bad links

Every day, millions upon millions of spam emails are sent out to inboxes across the globe. A large number of them come from criminals, who want to steal valuable personal data or to trick you into handing over large sums of money.

TMB offers a variety of products and services that can minimise this threat, while giving you full control over what can and cannot land in your inbox.

TMB Anti-Spam

Our Anti-Spam service is a reliable, affordable way to stop unwanted emails reaching your business. Thanks to a continuously updated threat database, TMB Anti-Spam isn't just protection for today, but also for the future. With its cloud-based scanning, it's compatible with almost any kind of email service, and it offers features like geographical filtering, attachment blocking and quarantining.

Microsoft Advanced Threat Protection

Integrating smoothly with Microsoft Office 365 and Exchange, Advanced Threat Protection (ATP) offers security not just in Outlook but also in tools like Excel, Word and OneDrive. Malicious links and unsafe attachments are stopped in their tracks, thanks to SafeLinks and Safe Attachments, which detect suspicious behaviour or content and place unsafe material in a 'Detonation Chamber', where it can't do any harm.

Mimecast

Built for the enterprise, Mimecast is designed to meet the demands of larger organisations. With protection against ransomware, impersonation, spear-phishing and internal mail threats, it's the complete email safety solution. Cloud based scanning and analysis, DNS authentication and a constantly updated threat database are just a few features it includes in its multi-layered toolbox.

Whichever technology you use for email security, TMB will provide regular feedback and reports, so you know how the service is protecting you. Where possible, users will also be able access an online portal to see what's happening behind the scenes.

If you're unsure which solution is right for your business, get in touch, and we'll be happy to point you in the right direction.
